

SnapGrab is the fastest and easiest way to shop local and have all your favorite stores and restaurants delivered within minutes. (Even if they don't traditionally deliver)

We work with hundreds of local merchants within your city to provide you with a low cost and efficient on demand delivery service. Place an order through our app from any store or restaurants, track it and see it be brought right to you!

SnapGrab is a logistics company developed in Montreal, Quebec by two Montrealers wanting to make it easy and accessible to have anything brought to you when mobility is an issue. The SnapGrab platform connects all businesses, stores and restaurants to their customers through our Grabbers (drivers). Now merchants across the city can bring to their customers the products they love in a matter of minutes. SnapGrab is more than just an app - it's a lifestyle. What you love is enjoyable as of right now!

Since September 2016, We served over 3000 happy customers and have delivered over 9500 orders in Montréal. As of October 2017, we launched the biggest update yet, SnapGrab V2.0 which enhanced the on- demand ordering experience dramatically.

How It Works?

Shop Around: Browse through pictured menus of all partnering stores and restaurants

Anything: Want something special and specific, manually enter your order from any store or restaurant in the custom tab, place your order and a Grabber will be on his way!

Easy Search. Want tacos? Want new sneakers? Just type "tacos" or "sneakers" into search! A listing of the nearest local stores and restaurants selling what you want will pop up, and all you've got to do is pick your place, choose what you want, and place your order. It doesn't get much easier than that.

Fast. Our Grabbers deliver from anywhere in less than 1 hour with a smile!

Personal Service. If you forgot to mention anything in your order, your Grabber is a text away.

Real-Time Updates. Track your order in real time with our GPS tracking system. We even send you important notifications along the way.

Convenience. We'll deliver to your home, office, a park—wherever you're at!

Pay with a tap. Pay right in the app with your card.

For Local Merchants

SnapGrab has developed the merchant portal so that every local merchant can control their deliveries from one easy to use dashboard. As of now SnapGrab For Merchants gives local stores and restaurants 2 new delivery channels.

Menus: Merchants can build their digital storefront that will appear on the SnapGrab App. Merchants can create beautiful item pages with prices, description and professional in-app photography. Our app users can purchase their favorite right of their mobile device and receive it within the hour

The booking form: Manually request a driver from SnapGrab's fleet to pick up an order and deliver to a customer. .
